

Wild Pre-Pyrenees

Restoring an Alpine/ Mediterranean mountain landscape.

 Project coordinator | Pau Costa Foundation

 Duration | October 2023 – September 2025

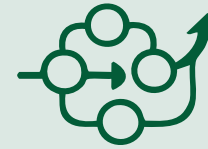

Key outputs

Participatory process

Diagnosis of ecological, socio-economic and territorial dynamics

Development of the Theory of Change

Development of an ecological restoration plan and a business plan

Production of outreach videos

Goal

Identify the key ecological processes and their degree of degradation in the western Catalan Pre-Pyrenees, and design a strategic ecological restoration plan that enables the recovery or reinforcement of their natural dynamics while generating social and economic benefits with the involvement of local stakeholders.

Partners

Impact

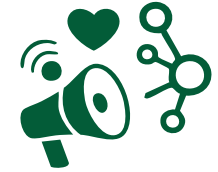

Establishment of initial conditions to promote planned ecological restoration adapted to the territory.

Implementation of a shared ecological restoration strategy.

Enhancing collaboration between managers, technical experts, and local entities.

Showcasing best practices, raising awareness, and building connections among stakeholders.

Funding programme:

 Endangered Landscapes & Seascapes Programme
